

24H LE MANS TV APP – WORKAROUND OF CHROMECAST ISSUE WITH IOS DEVICE

IOS 17.5.1 introduces on some devices an issue with the Chromecast feature on the native application. The team is working on fixing the issue.

In the meantime, 2 options are possible to workaround this issue

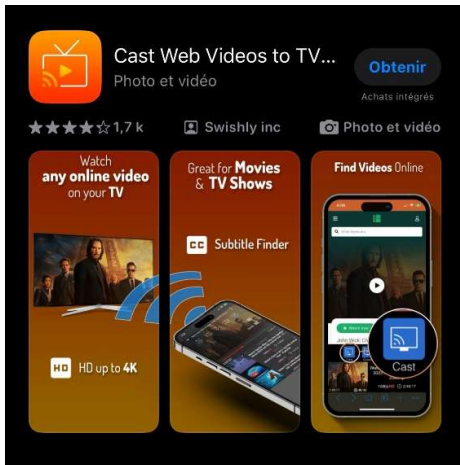

Option 1/ On a PC or MAC, connect to the web application <https://24h-lemans.tv> with the same credentials as usual.

Open the video you want to cast and at the bottom right of the video click on the cast icon, then select your Chromecast device:

Option 2/ On the Apple App Store, you can install some applications that enables to cast screen or website.

For instance the “Cast Web Videos to TV – iWebTV” application enables to cast video played form the browser: <https://apps.apple.com/us/app/cast-web-videos-to-tv-iwebtv/id999462129>

You can enable a 7 days trial by selecting “ALL PRO Features + services” and “Start Free Trial”.

In the user interface, connect to <https://24h-lemans.tv> , login with your credentials, start playing the video and cast with the CAST button.
